

# BTK<sup>®</sup>

Bullet-hole Testing Kit

**Field Identification of:**

- Direction of the Bullet
- Diameter of the Bullet
- Bullet Type (Lead/Copper)

The identification of bullet-holes and marks produced by projectiles may be very important in the investigation of criminal cases involving the use of firearms.

IDenta Corp. offers BTK (Bullet-hole Testing Kit)<sup>™</sup> - a portable laboratory for the rapid identification of bullet holes.

BTK enables simple, rapid and reliable identification of suspected bullet holes in the field.

Distributed by IDenta Corp.  
info@identa-corp.com

IDenta Corp. was established in 2002 with the mission of developing & manufacturing a variety of forensic products.

IDenta Corp. has successfully launched on the spot field kits for the identification of drugs, precursors of drugs, explosives & bullet-holes.

**Our Products**

- Drug Testing Kits
- Precursor of Drugs Testing Kits
- Explosives Testing Kits
- Bullet-hole Testing Kit
- Portable Sniffer for Drugs/Explosives

**What Makes Us Different?**

- Substance & Traces Test
- Green Products
- Patents
- No Chemicals Exposure
- Advanced Chemistry
- Immediate Results
- Safe & Accurate
- User-friendly
- 3 Year Warranty

# SNIFF&Know<sup>®</sup>

HANDY SNIFFER FOR DRUGS/EXPLOSIVES

## THE REVOLUTION

Presenting the latest technological innovation of IDenta Corp. --  
The Sniffer: A Fast Collection & Detection System for Suspected Particles on Surfaces Everywhere.

### Collect Particles From:

- Boxes
- Rooms
- Cars
- Pallets
- Clothing
- and more
- Containers

### Sniffer Suitcase Includes:

1. Sniffer with battery
2. Charger
3. Electricity Adaptor
4. Magnifying glass with light
5. Gloves – sterile, one time use
6. Kits - 10 detector kits (for illicit drugs or explosives)
7. Accessories
8. Optional Car Charger

The Sniffer is compatible with IDenta Sniff&Know<sup>™</sup> Drug and Explosives Test Kits.

# Touch&Know<sup>®</sup>

DRUG TESTING KITS

The first safe and easy to use portable tests specifically designed for use by untrained personnel. The patented design of the Smart-Tip<sup>™</sup> probe allows for safe sampling of a suspected substance. There is no need for physical contact with either the substance or the suspected user. No knowledge of chemistry is required to use Touch&Know<sup>®</sup> drug testing kits. All reaction materials are sealed in the reaction chamber at all times, eliminating any safety concerns. Results are color coded for easy reading.

Box of 10 Kits

# Touch&Know

EXPLOSIVES TESTING KITS

Each test unit consists of a sampler, up to three crushable, hermetically sealed glass ampoules, and a reaction chamber. The ampoules are filled with the chemicals required to perform the test. No measuring, mixing or dispensing of reagents is required.

### Test Kits Available:

- General Screening Explosives (TNT - PETN - RDX - Nitrate)
- Urea Nitrate
- Ammonium Nitrate
- TATP/Peroxide
- Chlorate/Bromate
