IDenta Touch&Know

DRUG TESTING KIT

Procedure Card for IDT 7000-10 IDenta **Ketamine (Solid)** Identification Kit Substance

As a precaution, gloves and eye protection should be worn when handling drug substances and using test units.
Do not puncture any part of unit. Do not remove probe once locked into unit.
In the unlikely event of a spill, rinse affected area thoroughly with water.
Keep out of reach of children.

Test Preparation	1 Remove the Smart-Tip™ probe from test unit. 	2 Sample suspected substance. Solid Swipe the paper of the Smart-Tip™ probe across the suspect substance. 	3 Lock Smart-Tip™ probe into test unit. Press firmly. 	⚠ Do not continue unless probe is locked below the Flex Pins and cannot be removed from the test unit. A click sound will indicate the probe is locked.
	Identification	4 With thumb and forefinger , squeeze chamber 1 until capsule breaks. 	5 Gently shake test unit for 2-3 seconds. 	
		Identification	6 With thumb and forefinger , squeeze chamber 2 until capsule breaks. 	
Results	 The appearance of a lavender color on the paper indicates the presence of Ketamine . The liquid will also have a cloudy lavender precipitate.			
	 If the color of the paper does not change or becomes a dull blue-green color, Ketamine is not present. The liquid will also remain clear and become a dull purple color.			
Disposal		The test kit is safe to dispose of in the trash.		 10-13

99% accurate presumptive field screening when used correctly.

All results are presumptive. If necessary, further confirmatory testing by a competent drug testing lab may provide additional identification and quantification using gas chromatography/mass spectrometry analysis.
